

# **Veterinary Technology Handbook Fall 2009**

## **Welcome to Veterinary Technology**

We have an excellent program lined up for you. Our objective is to prepare you to work in the veterinary field. Your time here will be challenging and rewarding. We have many hands on opportunities so that learning takes place not only with the mind, pen and paper but by actually practicing the skills you learn about in the classroom.

The college follows a 16 week semester and two 8 week sessions within the semester. For Veterinary Technology we utilize fall, spring, summer session, fall, spring and then internship. If you work, commute, need more study time or additional transfer classes then consider pursuing the degree over a three rather than two year period of time. Visit with your advisor about appropriate course selection to meet your needs.

## **Veterinary Technology Handbook – Study Guide**

Name: \_\_\_\_\_

Directions: Read and understand the Vet Tech Handbook. If you have questions please ask a VT instructor. The material in the handbook is testable material in all Vet Tech Courses.

1. If starting the Veterinary Technology program – associate of applied science degree in the fall of 2009, when can one expect to graduate?
2. Explain the semesters / sessions that you will be taking required Veterinary Technician Option classes?
3. To obtain the 72 hour Veterinary Assistant Option in two years, how many credit hours will have to be taken each semester?
4. To obtain the 80 hour Veterinary Technician Option in two years, how many credit hours will have to be taken each semester?
5. To obtain the 80 hours Veterinary Technician Option in two years, how many credit hours will need to be taken in the summer?
6. If one wants a hard copy of the handbook, where can it be obtained?
7. Where on the college's web site can the Vet Tech handbook be found?
8. List one other reference found at the same site:
9. Explain "Academic Bankruptcy"
10. In which class do students learn to and actually get to care for the animals housed at NCTA?
11. List 3 skills that as a VT student you could practice on your own animal here at school?
12. If your animal tests positive for internal parasites, where can de-wormer be bought?
13. Before housing your personal animal here, you will need to check "room availability" with:
14. What type of surgeries may be done here at NCTA for student owned animals?
15. If your own animal is sick or injured, which veterinarian should your call to take care if it?
16. Standard attire for the VT classroom is:
17. What additional clothing requirements may be required for labs?
18. List 5 skills from the AVMA essential skill list you are most looking forward to learning:
19. List 3 reasons having, reading and referring to your class books:
20. Explain the calculator policy:
21. Explain the cell phone policy:
22. Explain the computer in the classroom policy:
23. Where are three places you can look to figure out what classrooms each or your classes on in?
24. Where can class scheduling forms be found?
25. Do you have the class schedule form filled out for yourself?
26. Where are 4 locations on campus where computers are available for student use?
27. Explain two ways Veterinary Technology Conferences might be used to supplement your education?
28. What type of behavior is expected in the classroom?
29. Why is reading and being familiar with course syllabus and outlines important?
30. What 3 degrees from Veterinary Technology Systems can be completed on campus?
31. Which degree option must be completed utilizing two campuses?
32. Which degree option requires 30 credit hours?
33. Which degree option requires 72 credit hours?

34. Which degree option requires 80 credit hours?
35. Which degree option(s) has/have several “emphasis” available?
36. Which degree option has the greatest flexibility in selection of classes?
37. Which associate degree options would prepare you for a job after graduation?
38. Which degree option is required to become a licensed veterinary technician?
39. Which degree option requires a CGPA of 70% (2.0) (C) to graduate?
40. Which degree option requires a CGPA of 80% to graduate?
41. Which degree option is accredited by the AVMA?
42. Which degree option requires passing an exit exam?
43. List all emphasis areas available:
44. Which emphasis area looks the most interesting to you?
45. With the Veterinary Assistant Option, what is the minimum number of VT credit hours that one will need to take?
46. How many college core hours are required for the Veterinary Technician Option?
47. In which semester Parasitology usually taken?
48. In which semester is Pharmacology usually taken?
49. In which semester is Large Animal Clinicals offered?
50. In which semester is Large Animal Techniques II offered?
51. When is Surgery Prep class?
52. To be eligible to take the exit exam one must:
53. When is the exit exam taken?
54. How many written sections make up the exam?
55. How many practical sections are included in the exit exam?
56. List two reasons that taking 12 credit hours each semester may be very important?
57. What CGPA is necessary to remain on financial aid?
58. What should you do if the fire alarms are sounded?
59. What percentage grade is necessary to pass a class with a “B”?
60. What percentage grade is necessary to use a class as a pre-requisite for the next in the series?
61. When is the graduation check done?
62. If pregnant, what must be done before taking certain lab classes? Why?
64. Of the immunizations needed for college, which one is unique to Veterinary Technology? Why?
65. Cheating on assignments on in class may result in:
66. List two examples of behavior that falls under “cheating”:
67. Who is the Veterinary Technology secretary?
68. How long is and when is Internship done for the Veterinary Assistant Option?
69. How long is and when is Internship done for the Veterinary Technician Option?
70. How long is and when is Internship done for the Veterinary Technology Certificate?
71. Which option requires a two week observation with a veterinarian?
72. When is this observation done by?
73. Which option requires an interview?
74. Where can internship locations as well as full time employment information be found? (two locations)
75. List 5 possible job opportunities after graduation: Circle three that you are especially interested in.

76. What three criteria must be met to become a licensed veterinary technician in Nebraska?
77. How does one get a locker assigned to them?
78. What are the two program outcomes for the Veterinary Technician option?
79. What are the two program outcomes for the Veterinary Assistant option?
80. If in need of a counselor, what is one number you can call?
81. What does STVMA stand for?
82. What supplies are needed for classes?
83. Are tests returned to the student?
84. Explain classroom attendance policy:
85. Where does one find the list of classes required for the Veterinary Technology options?
86. How does one determine which class is offered which semester?

**Advisor:**

Veterinary Technology instructor is your academic advisor. Please visit with them about classes a minimum of twice each semester.

**Alcohol or drug use**

Alcohol or drug misuse on or off campus may be cause for dismissal.

**Animal Care**

Please remember to care for animals in a caring and appropriate manner when you are on and off campus. Your conduct is a reflection of NCTA, the Veterinary Technology program and the Veterinary Technician profession. Be responsible and compassionate to all animals.

**Animal Care**

In this field we must all demonstrate compassion towards and a commitment to high quality patient care. In the event an animal used in the program becomes sick or injured, a veterinarian will be called to examine the animal and such examination and recommendations documented in the animal's medical record. Mistreatment of animals by students may result in receiving a "0" on an assignment and/or dismissal from the class or program. Veterinary Technician students are responsible for care of program animals including dogs, cats, horses, rodents, exotics and occasionally others through the Facility Management Class. Pain and Discomfort statement: Some procedures by their nature may cause pain and discomfort. Techniques to minimize these are taught and used in class.

**Animal Care – Student Owned Animals**

NCTA's primary purpose is to provide a learning experience for our students and to provide care for the college owned animals. The Veterinary Technology Department at NCTA does not operate an outside clinic. We are not set up to adequately provide full veterinary clinic services.

For the purpose of providing hands on experiences and additional learning experiences students are welcomed to perform procedures they have learned in class for their own animals.

Vaccinations may be given to student owned animals.

Student owned animals may spend the day in kennels if they are being used in class, for bathing and grooming or for student practice. Check with Facility Mgt Team Leader for accommodations. While here the animals must be kept in a run, cage or other appropriate housing. Fill out and hang up a "special instruction" form on the animal's cage or run so we know who the animal belongs to. The owner is responsible for all care and cleaning while the animal is here. If the animal is not cared for adequately and Facility Mgt people do it, owners are charged a boarding fee of \$5.00-\$20.00 per day.

Animals that are positive for parasites may take the signed parasite test form to the veterinary clinic here in town to buy dewormer. During surgery classes a limited number of surgeries can be done on student animals. First priority is given to our own animals, then 2<sup>nd</sup> year Vet Tech student animals, then 1<sup>st</sup> year Vet Tech student animals.

Hills Science Diet Foods are available to students at discount prices with profits going towards Vet Tech Scholarships. Purina equine products are available to students at discount prices.

Animals are not to be in the Vet Tech Class room building unless specifically needed for class. No dogs on carpet! They may hang out with you in the Dairy Barn lounge if vaccinated and healthy.

## **Animal Use**

AVMA: The use of live animals as part of this course provides an essential and unique learning opportunity, teaching skills as well as compassion in a way not possible without the animals themselves. AVMA – CVTEA, in the P&P, under Standard X – Curriculum 10b states “Integration of nursing, technical, and medical skills within the curriculum must use live animals...” Under standard V – Resources for Clinical Instruction under 5A it states “Animals of various common domestic and laboratory animal species must be available for use in teaching.”

## **Attendance:**

It is important that you attend class. The information obtained in class makes learning the material much easier. More will be gained from the class if you attend because of the ideas and information shared during discussions. Teamwork is an important aspect of what is learned in any class as well as on the job. Class room policies vary, be sure to read your course syllabus and outline. Excessive absences often result in lowered grades and possible dismissal from class. It is your responsibility to talk to your instructor and make up work missed. In addition, federal financial aid regulations require that a non-attendance report be turned into the financial aid office if 5 days in a row are missed.

## **Attire**

To promote professionalism and prevent disease transmission we require specific class and lab attire. In all Vet Tech classes the standard attire is a scrub top, nice jeans or slacks. Professional and specific attire varies in lab classes but include the items listed below. Please have your name on lab jackets etc.

- ❖ short lab jacket
- ❖ long lab jacket
- ❖ wrap around
- ❖ coveralls
- ❖ over boots
- ❖ closed toed shoes or boots
- ❖ scrub top
- ❖ scrub pants

Possible places to buy your apparel include but are not limited to:

- Veterinary Apparel <http://veterinaryapparel.com>, 800-922-1456
- Uniforms, 19<sup>th</sup> & Broadway, Scottsbluff, NE 69361, 308-635-9000, [www.uniformstlc.com](http://www.uniformstlc.com)
- Jasco Uniform Co. 800-222-4445, [www.jascouniform.com](http://www.jascouniform.com)
- JC Penny Catalog Sales, 800-709-5777, [www.jcpenney.com](http://www.jcpenney.com)
- NCTA Book Store
- Walmart
- Dr. Scrubs: 108 W Front St. North Platte 308-532-9000

## **AVMA Essential Task List**

The AVMA Essential task list is included at the back of your hand book. Use this as your guide. Check off the skills as you go over them in class.

## **Bankruptcy**

Academic Bankruptcy is available to NCTA students who have a GPA or CGPA of less than 2.0 (C) and have completed no more than two academic semesters. Academic bankruptcy will not change GPA as far as financial aid is concerned. See College student handbook for further details.

## **Books**

Your Vet Tech Books are used not only in classes, but to assist with your review for the licensing exam and make excellent references after you are working.

## **Bulletin Boards**

Bulletin Boards are located in the hall area of the Vet Tech building. Check them a couple of times a day because this is where class schedule changes, club meetings etc are posted.

## **Calculators**

Calculators are not permitted in all classes or for all tests. If used, they must not be programmable or shared with other students during tests.

## **Cell Phones**

Please turn off cell phones and do not use them as calculators, communication tools etc during class.

## **Class Registration**

Class registration is done through the WAM system. ID number is obtained from Vicky Luke in the Student Affairs Office in Ag Hall. Use the required class list to know which classes to sign up for each semester. Twelve hours fulfills full time status for financial aid and medical insurance. 18 – 20 hours each semester is necessary to complete the degree in 2 years. If you want to take more than 21 hours in a semester special permission will be necessary.

## **Class Registration Change**

Adding classes – can be done through WAM through the first week of classes. After the first week a registration change form is needed – available from Vicki Luke in admissions.

Dropping classes – is done through WAM. It is always a good idea to talk to your advisor or instructor first.

## **Class Rooms**

Class room assignments are posted on bulletin board in hall, outside each room and on the college's WEB site.

## **Class Schedule**

Use a planner to organize your day. Scheduling forms are available in mail room file cabinet and in the handbook.

## **Computers**

Computers are available in the Vet Tech Building, Library, Dorms and Computer labs. Lab top computers in the classroom are allowed at the discretion of the instructor and will not be permitted if used improperly.

## **Conferences**

Veterinary Technology students have the opportunity to attend certain designated continuing education seminars both on and off campus. Attendance is often required. Registration costs range from \$10.00 - \$75.00. Budget accordingly. Some conferences may be taken for college credit as well.

**Conduct:**

Responsible, ethical, adult behavior is expected. Lack of such may result in being asked to leave class for the day or permanent withdrawal from the class. Any abuse of the animals or the drugs used in class will result in being dropped from class. Please, no food or drink in lab. Please leave lecture and lab room neat and tidy. Misuse of professional supplies may result in dismissal.

**Course descriptions:** See College catalog

**Course Syllabus:**

Within the college and department standards each class varies slightly in the teaching format, attendance, grading and testing philosophy – please read course syllabus and outlines closely.

**Educational Opportunities****Certificate**

- Animal Care (30 hours)

**Associate of Applied Science**

- Veterinary Assistant Option (72 hours)

- Veterinary Technician Option (80 hours & CGPA of 80%)

**Minors (added to AAS)**

- Business

- APS – Livestock

- APS - Equine

**Emphasis (added to AAS)**

- Equine
- Food Animal
- Exotic
- Companion Animal

**Certificate**

Equine Dentistry (8 hours) Pre-req – Licensed Veterinary Technician or Licensed Veterinarian or Vet School Student

**Associate of Science**

Expanded college core and transferable classes – does not lead to licensing

**Bachelors Degree**

Veterinary Technologist – Capstone Program with UNL – Requires AAS – Veterinary Technician Degree

## Educational Opportunities – Descriptions and Requirements

### Associate of Applied Science - Veterinary Assistant Option

- The Associate of Applied Science, Veterinary Assistant Option allows the greatest flexibility of class selection and career planning. This option requires 72 credit hours, a 12 week internship and a CGPA of 70% to graduate.

### Associate of Applied Science - Veterinary Technician Option

- The focus of NCTA's Associate of Applied Science, Veterinary Technician Option is to provide the hands-on skills and academic background needed to accept career opportunities as an entry level veterinary technician. The program is American Veterinary Medical Association (AVMA) accredited with the curriculum based around the AVMA essential tasks and skill list. Veterinary Technology – Technician Option graduates are qualified to sit for the Veterinary Technician National Licensing Exam and become a licensed Veterinary Technician. NCTA maintains a wide variety of animals to provide the students with a consistent and broad background of experience. This option *requires 80 hours of observation in a veterinary clinic, 80 credit hours of structured classes covering AVMA essential skills, a 12 week internship, passing the exit exam and, a CGPA of 80%.*

### Veterinary Technologist: (Baccalaureate Transfer Option (Capstone))

A baccalaureate degree as a Veterinary Technologist can be pursued through a collaborative effort with NCTA's Veterinary Technician Option Degree and the University of Nebraska-Lincoln.

Veterinary Technology  
Animal Care Certificate  
30 hours required

**General Education**

**Select 6 hours from the following** 6

VTS 1314	Math for Vet Techs	3
MTH 1103	College Math	3
PSY 1011	Learning Communities	1
AIT 1053	Introduction to Computers	3

<p><b>Summer Session (8 weeks)</b>                  Large Animal Clinicals (2)                  Radiology II (3)                  Fur and Feather (3)  <p style="text-align: right;"><b>Total Hours 8</b></p> </p>	<p><b>Summer (2<sup>nd</sup>)</b>                  Internship for Vet Tech (4)</p> <div style="text-align: center; margin-top: 20px;">  </div>

Remedial classes – based on ACT (18) and test outs: Computers, Reading, Writing, College Math	Some of the electives available: STARS, Ultrasound, Animal Mgt, Livestock Nutrition, Hills Small Animal Nutrition, Safari, Adv Exotics, Dog Obed, Adv Dog Obed, World of Work, Making a Difference, Walk on the Wild Side, Spanish for the VT, Eq Safety, Calving Rotation, Intro to Vet Office, Radiation Safety, Capstone, Pain Mgt, Dog Grooming, Equine Dentistry, business classes
--	--

Additional Requirements for the Veterinary Technician Option: 80 hours of observation, Passing Exit Exam, CGPA 80% (B)

**E-Mail Etiquette:**

Any e-mail could be sent anywhere in the world so choose content accordingly. Select a professional email address.

**Electives:**

Interesting electives are available from every department each semester. Check the college wide schedule.

**Emergencies:****Calling Tree**

For emergencies and disasters affecting primarily the <u>Veterinary Technology Division</u> contact the following people in this order:				
Contact in order listed	Phone – work	Phone – Home or cell	E-mail	Home address
Marylin Henry	308-367-5222		mhenry1@unl.edu	
Barbara Berg	308-367-5219	308-367-4237	<a href="mailto:bberg2@unl.edu">bberg2@unl.edu</a>	707 Custer Curtis, NE
Ricky Barnes Wach	308-367-5223	308-569-2443		1120 Main St. Farnam, NE
Judy Bowmaster Cole	308-367-5282	308-367-5595 402-340-1260	jbowmaster1@unl.edu	74329 Rd. 389 Curtis, NE
Corey Reng	308-367-5221	308-325-0290		
For campus wide emergencies and disasters contact the following people in this order:				
Kevin Mills	308-367-5253	308-367-6569	308-367-6569	
Weldon Sleight	308-367-5200	308-367-4428	308-367-5510	

**Student Injuries or serious illnesses occurring on campus:** Depending on the severity of the injury or illness and the student's wishes, transport the student to the Curtis Medical Clinic or call 911 for emergency medical technicians and ambulance.

**Tornado:** Tornado Warning is a 5 minute siren. If the siren is sounded or NCTA personnel indicate a tornado threat, go immediately to an interior room or hallway on the ground floor. In the Veterinary Technology building interior rooms include the conference room, student mail room, radiology darkroom and the radiology hall.

**Fire – Most Important:**

- Leave the building immediately using the nearest door.
- Meet on the south side of the vet tech building.
- Do not re-enter building until approved by NCTA employee.
- If an animal can be easily taken with you when you leave do so other wise do not.
- Do not enter buildings that are already burning, smoke inhalation will slow you down and possibly kill you. Leave this to fully equipped emergency personnel.
- Contact emergency personnel immediately.

**Fire:** Post a lookout for possible dangers. Have your trailer hitched and pointed towards the road. Leave barn and building doors unlocked. Put halters and collars on animals. If you believe that the barn or animal facility will burn before emergency personnel will arrive, release the animals to a safer location. Animals often will return to a place they know as home. If caught out in the open when the fire hits, seek areas with sparse vegetation or bare ground. Avoid trying to out run the head of the fire, instead watch for slower burning flanks. Do not attempt to control the animals that are with you. Let them go free, they will have a better chance of escaping the fire.

**Evacuation:** Red Cross Shelters do not accept pets. Depending the areas affected, as many animals as possible will be taken with students, faculty and staff to other locations. Such locations include but are not limited to personal homes, area veterinary clinics and boarding facilities.

**For animals that cannot be evacuated:** Post a highly visible sign in a window to let rescue workers know how many and what type of pets were left behind. Leave plenty of water in a large open container which cannot be tipped over. Leave food in manner practical for species involved. Depending on situation and species it may be best to not tie or cage the animal, as the chances for survival are greater if they can escape easily.

**Lost Animals:** Call or visit local Veterinary Clinics, Shelters and Sheriff Department.

***When deemed safe, post and distribute lost animal posters.***

**Earthquake:** During the quake, remember to stop, drop and hold. Once the tremors have stopped, take a good look around. Do not enter buildings that may have become unstable during the quake. Like you, your animals will be frightened and need reassurance. If an animal has become injured or trapped, call emergency personnel immediately. Be prepared for aftershocks.

**Flood:** If you receive notice of rapidly rising waters, move all animals, feed and water to higher ground. Escape routes may be cut off quickly so avoid leaving animals in standing water or in areas that can be easily cut off by the flood.

**Pet Disaster Kit:** A prepared disaster kit, kept in a safe and easily accessible place, will enable you to provide immediate care to your animal in an emergency. A calm, well-trained animal who is either on a leash or in a carrier, will be more welcomed wherever you go. Items to include:

- Sturdy crate and/or carrier
- Food/Water, 7 day supply for each pet
- Litter and litter box
- Manual can opener and plastic lids
- Pet First Aid Kit
- Emergency phone numbers
- Long-term confinement equipment such as chains, cable runs and/or tie-out stakes and portable caging
- Large plastic bags for cat litter disposal and dog clean up
- Leashes
- Non-spill bowls
- Any special medications
- Copy of your pet's current vaccination history
- Phone number of your Vet
- Newspapers, towels and paper towels

**Large Animal Disaster Kit:** Have ladder(s) long enough to reach the roof, cotton ropes, shovels, rakes, water buckets, flashlights or lanterns, blankets and a minimum of 100 feet of hose. Restraining equipment such as cotton halters, cotton lead ropes, collars, whips, hog snares, blindfolds, fence panels and wire kits are also a must in an emergency. Have an adequate, portable first aid kit and battery powered radio ready at all times.

### Exit Exam

The Exit Exam is one required criteria for the Veterinary Technician Option. At the end of the student's last semester, the Veterinary Technology Exit Exam is offered. To be eligible to take this exam the Vet Tech student must be able to have successfully completed (with the exception of internship) the 80 required credit hours by the end of the semester they take the test.

The entire comprehensive examination must be passed with an average grade of 70% or better and each section must be passed with a minimum grade of 60% or better. A maximum of two sections may be repeated during the provided repeat time. Each student must successfully pass the exit exam to graduate as a Veterinary Technician.

<b>Topic</b>	<b>Written</b>	<b>Practical</b>
Anatomy	X	Combined Practical
Diseases	X	
Terminology	X	
Pharmacology	X	
Anesthesiology	X	X
Parasitology	X	Combined Practical
Hematology	X	
Clinical Pathology	X	
Facility Mgt	X	Combined Practical
Fur & Feather	X	
Animal Care	X	
Intro to Animal Science & Production Animals	X	Combined Practical
Lg Animal Techniques I & II	X	
Nursing I and II	X	X
Radiology I and II	X	X
Surgery Prep	X	X

Written sections are 50 questions in length and worth 100 points. Practical sections are worth 100 points each. Some sections may be used as final exams in spring semester classes.

### Repeat Exit Exam

With completion of the following criteria, the Exit Exam may be repeated the following year; six months of additional experience in a veterinary clinic (minimum of 20 hours per week), successful completion (80%) of two NCTA repeat VT classes, one being Licensing Prep and the other based on identification of a review area needed.

### Financial Aid

GPA of 2.0 (C) is needed to remain on financial aid. See the College catalog or student handbook for complete details. Full time status is considered to be 12 hours each semester.

**Fire Alarms:** Leave the building immediately using the nearest door. Meet on the south side of the vet tech building. Do not re-enter building until approved by NCTA employee.

**Flexibility:**

The syllabus, outline and schedule are guidelines for classes, but are subject to change as needed.

**Grades:**

For conversion of % to grades see college catalog. 60% is a passing grade. Some Veterinary Technician Option classes require a 70% in order to progress to the next class in the series.

**Grades – Due Process:**

Questions or disagreements over grades should be discussed with the instructor involved. If still unsatisfied the student must first go to their advisor and explain the situation to the advisor. The advisor will try to resolve the issue, or will instruct the student to make a written complaint explaining the situation to the Division Chair that supervises the instructor the complaint is against. Complaints should include dates, and the situation. The Division Chair will then forward the complaint to the Assistant Dean of Students. The Assistant Dean of Students will then present the information at Academic Council where both the student and the instructor will be able to present the situation from their viewpoint. Both the instructor and the student will be present for the others presentation.

**Graduation check (Senior grad check) and Application for Degree:**

Grad checks need to be completed at the beginning of your 3<sup>rd</sup> semester (2<sup>nd</sup> fall). The graduation check is conducted by the student, student advisor and finally the Student Affairs office. Senior grad check, degree application and graduation fee must all be completed before graduation can occur. Forms are available from the Vet Tech Secretary and in the Student Affairs office. (Ag Hall).

**Handbook:**

VT handbooks are available from Marylin or found on the NCTA Website – Veterinary Technology

**Health and Safety**

The career field of Veterinary Technology has inherent physical and biological hazards. Some of the risks include handling or being near animals, slick floors or corrals, use of toxic or corrosive substances, possible exposure to zoonotic diseases, radiation, anesthetics, the use of sharp or breakable instruments, and potentially dangerous equipment. Women who are pregnant must have their doctor's permission to attend certain classes as well as be willing to take extra precautions. It is the student's responsibility to inform an instructor immediately when a personal situation makes them more susceptible to hazard. Professional attire is critical for safety concerns and disease control. Students must wear scrub tops, slacks or jeans, closed toed shoes, lab jackets, coveralls, boots, goggles, or other protective clothing as appropriate. Long hair should be styled in a manner that keeps it from interfering with the task at hand. The student, by voluntary participation in classes and activities, acknowledges and agrees to assume the risks involved and not hold NCTA or the staff of the Veterinary Technology Systems Major liable. Students may wish to obtain liability protection and are encouraged to carry medical insurance and receive Rabies immunizations. The Health and Safety form must be signed and returned.

**Honesty:**

All cases of cheating or plagiarism shall be handled at the discretion of the instructor and based on the NCTA Student Code of Conduct (Student Handbook, Academic Dishonesty) and Disciplinary Procedures. Students may be disciplined by receiving an “F” on the assignment or course grade of “F”

**Immunization:**

In addition to the college requirements for a current physical and immunizations, Veterinary Technology recommends rabies immunization. Consult your local physician, county health department or the Lincoln County Health Department in North Platte.

**Instructors:**

<u>Name</u>	<u>Office Phone Number</u>
Marylin Henry, Secretary	308-367-5222
Barbara Berg BS, LVT, Division Chair	308-367-5219
Ricky Sue Barnes, DVM	308-367-5223
Judy Bowmaster-Cole, BS, LVT	308-367-5282
Steve Krull, DVM	308-367-5288
Cory Reng DVM	308-367-5221

**Internship - Veterinary Assistant Option:**

The internship is for a period of at least 12 weeks. Internship may be done during school breaks that are of at least one week in length, during the summer break, summer session or upon completion of all course work. Internship locations and agreements must be approved. Agreements may include more than one site. Official agreements are entered into between the student, the employer, and the college. Students identify learning objectives, design a methodology to accomplish them during the internship and show substantial progress towards completion of these goals through weekly reports, pictures and evaluation. Students are encouraged to carry their own medical, disability, and liability insurance.

**Internship - Veterinary Technician Option:**

(Pre req) Passing grade in Career Strategies, two-week observation with a veterinarian, passing grades in all Vet Tech courses up to the point of internship and CGPA of 2.0 or higher). The internship is for a period of at 12 weeks and is done with a supervising veterinarian. Internship may be done during school breaks that are of at least one week in length or upon completion of all course work. Internship locations and agreements must be approved. Agreements may include more than one site. Official agreements are entered into between the student, the employer, and the college. Students identify learning objectives, design a methodology to accomplish them during the internship and show substantial progress towards completion of these goals through weekly reports, pictures and evaluation. Students are encouraged to carry their own medical, disability, and liability insurance.

**Interviews**

As encouraged by the AVMA, students interested in completing the Veterinary Technician option must participate in an interview process. (Usually towards the end of the first fall semester)

**Job Interviews (internship and after graduation)**

Dress, look and act in a professional manner. Be prepared for a possible “working” interview.

**Job Listings**

Internship and full-time positions are posted on the NCTA – Veterinary Technology Web Site

**Job Opportunities:**

Mixed animal practices	Small animal practices	Specialty practices
Research	Breeding farms	Feedlots
Zoos	Kennels	Pet shops
Research	Industry	Ranch Management
Processing	Arboretums	Horse Farms
Veterinary Pharmaceutical Sales	Livestock Management	Pathology Labs
Diagnostic Labs	USDA	FEMA
Swine Units	Dairy Farms	Grooming
Behaviorist	Circus	Wildlife centers

**Learning Contract**

An agreement to hold to a standard of progress for your classes is required. Sign and return.

**Licensing:**

To work or to refer to your self as a veterinary technician in Nebraska, one must graduate from an AVMA accredited Veterinary Technology program as a Veterinary Technician, pass the VTNE (Veterinary Technician National Exam) and become licensed with the state.

**Lockers:**

Each student can sign up for a locker. List is posted on the locker room door. Keep your supplies and attire in this locker so they are available for class. Giving Marilyn an extra key or the combination proves valuable.

**Mail Boxes**

Each student has a mailbox in the mail/study room in the hall. Check it a couple of times a day.

**Medical Insurance**

Most insurance companies require full time status – 12 credit hours to remain on the family insurance plan.

**Observation**

Students interested in the veterinary technician option must spend 80 hours (two weeks) observing veterinarians and veterinary technicians in practice. The completed observation is a prerequisite for 2<sup>nd</sup> year veterinary technology classes and thus must be completed before enrolling in third semester (fall) classes. Form included in handbook. These are turned in to Marylin when completed.

**Parking**

A large lot is available on the north side of the Vet Tech Building.

**Performance criteria**

Performance criteria in classes include written and practical knowledge. Practical knowledge is demonstrated through practical and competency exams.

**Prerequisite Requirements:**

Passing grade in most classes is a 60%. Some VT classes which are prerequisites for another VT class must be passed with a 70% or higher to take the next class in the series.

**Program Outcomes for Veterinary Technology Systems****Veterinary Technician Option**

1. Upon successful completion of the Veterinary Technician Option students will be able to demonstrate proficiency in the essential skills and tasks outlined by the American Veterinary Medical Association. The Skills List represents the complex role of the veterinary technician and encourages instruction in motor skills, critical thinking, entrepreneurship and clinical application at the entry veterinary technician level in the following areas:

- Office and Hospital Procedures
- Pharmacy and Pharmacology
- Nursing Skills
- Anesthesia
- Radiology
- Surgical Prep and Nursing
- Parasitology, Hematology and Clinical Pathology
- Animal Husbandry, Handling, Behavior and Restraint

2. Upon successful completion of the Veterinary Technician Option students will be able to demonstrate the academic background needed to pass a national veterinary technician licensing exam.

# Program Outcomes for Veterinary Technology Systems

## Veterinary Assistant Option

1. Upon successful completion of the Veterinary Assistant Option students will be able to demonstrate an entry level proficiency in motor skills, critical thinking, entrepreneurship and clinical applications.
2. Upon successful completion of the Veterinary Assistant Option students will demonstrate proficiency in the skills and tasks outlined in their chosen classes. Depending on class selection the following areas may be studied:
  - Office and Hospital Procedures
  - Pharmacy and Pharmacology
  - Nursing Skills
  - Anesthesia
  - Radiology
  - Surgical Prep and Nursing
  - Parasitology, Hematology and Clinical Pathology
  - Animal Husbandry, Handling, Behavior and Restraint

### Scholarships

- Hills, VTCEA, STVMA, NVTA and NVTA all offer scholarships expressly for veterinary technology students. Each require application and have different selection criteria. Watch for notices and application deadlines.

### Repeat Classes

A student may repeat a course in an effort to improve his/her level of competency. If the original course grade was a C- or below the new grade will replace the old grade. If the original course grade was a C or higher then both grades will appear on the transcript and used to calculate accumulative GPA.

### Scholarships

Through the generosity of Hills Pet Nutrition and the Student Feeding Plan the division generates funds for several Vet Tech Scholarships each year. The VTCEA (Veterinary Technology Continuing Education Association) sponsors a scholarship once a year. Students are encouraged to apply for the NAVTA scholarship. In the Foundation there is the Dr. C.L. & Lydia Miller Memorial, the Samuel S & Ruth Kamino DVM Sch. and the NE College of Technical Ag-Veterinary Technology Scholarship.

### Stress

Life problems? Call Family Matters Counseling Services. 308-534-3351 or Bridges: 308-532-3000

### Student Senate

Attend the initial meeting during the first week of fall classes and possibly run for office.

### **STVMA (Student Technicians of Veterinary Medicine) (Vet Tech Club)**

STVMA is a student run association designed to help students prepare for active participation in state and national technician organizations. As a member of STVMA, students will enjoy social, educational and community service activities. Membership and participation is required to be in the Vet Tech program.

### **Supplies**

In addition to the standard pencils, pens etc needed for classes, Veterinary Technology Students are required to purchase numerous pieces of equipment and supplies used in classes such as:

Adhesive tape 1” (4 rolls)	Leash	Forceps - Kelly or Crile
Gauze roll- wide flat	Hoof pick	Forceps - Thumb
Nail trimmers	Microscope slides	Microscope cover slips
Pen light	Scissors – bandage	Watch
Thermometer – small animal	Calculator	Stethoscope
Thermometer – large animal	Small spiral notebook (pocket sized)	

The supplies may be purchased individually or in a complete kit (watch not included) from the NCTA bookstore or Uniforms, 308-635-9000; [www.uniformstlc.com](http://www.uniformstlc.com). These supplies will be needed and used during classes and labs. Not having any of the above on lab days may/will result in being dismissed and counted absent from class for that day. Utilize your school locker.....BE PREPARED!

### **Testing – Class Room:**

Tests taken outside the scheduled testing time may be decreased in grade by 10%. Tests may or may not be returned to the student. Tests are comprehensive. See course outlines for details.

### **Tobacco**

No tobacco use in the classrooms, labs or building.

### **Tornado**

Tornado Warning is a 5 minute siren. If the siren is sounded or NCTA personnel indicate a tornado threat, go immediately to an interior room or hallway on the ground floor. In the Veterinary Technology building interior rooms include the conference room, student mail room, radiology darkroom and the radiology hall.

## Tuition and Fees:

Tuition:	\$ 7,380.00
Room (2 academic years and one summer semester)	\$ 4,275.00
Special Enhancement Assessment (per month) (25.00)	\$ 506.25
Meal Plan – 4 semesters and 1 summer	\$ 4,918.00
Lab Fees	\$ 214.60
Health Fees	\$ 125.60
Technology Fees	\$ 360.00
Registration Fee (4 semesters and 1 summer session)	\$ 120.00
Books	\$ 1,500.00
Matriculation Fee	\$ 25.00
Graduation Fee	\$ 25.00
Seminars and Field Trips	\$ 125.00
Supply Kit	\$ 110.00
Additional supplies	\$ 30.00
STVMA club dues	\$ 10.00
Uniforms (scrub top, lab coats, scrubs, over boots, coveralls)	\$ 100.00
	-----
Estimated Total	\$20,184.45

## Work Ethic

Work ethic points are included in many Vet Tech classes. These points include such things as STVMA participation, community service, recruiting, willingness to help others, attendance, punctuality, professionalism, dress, personal accountability, quality care for animals and team spirit.

**Veterinary Technology  
Health and Safety**

\*\*\*\*\*

**Please read all information carefully**

**Sign and date the document at the bottom of the page!**

\*\*\*\*\*

Laboratories and clinics in the Veterinary Technology Systems Major have inherent physical and biological hazards of which one must be aware for one's own safety, as well as the safety of one's family and friends. Physical facilities in the college are designed to provide protection, but must be operated properly. Some of the risks include handling animals or being near animals, slick floors or corrals, use of toxic and corrosive substances, possible exposure to zoonotic diseases including but not limited to rabies, radiation, anesthetics, the use of sharp or breakable instruments, and potentially dangerous equipment. Women who are pregnant must have their doctor's permission to attend classes that include clinical applications and labs as well as be willing to take extra precautions. It is the student's responsibility to inform an instructor immediately when a personal situation makes them more susceptible to hazards. Students should wear lab coats, coveralls, boots, or other protective clothing when required. Such clothing should not be worn outside Veterinary Technology class situations. In addition to the immunizations required by the college Rabies immunization is recommended. Students may wish to obtain liability protection and health insurance is highly recommended.

The student, by voluntary participation in classes, laboratories, and clinical activities, acknowledges and agrees to assume the risks involved and not hold NCTA or the staff of the Veterinary Technology Systems Major liable.

Students signing this form acknowledge they have read all above information carefully and agree to all terms involved.

## **STUDENT ASSESSMENT POLICY**

At the Nebraska College of Technical Agriculture commits itself to providing opportunities for a successful academic experience for all students, it is the policy of this institution that all full-time students will be required to participate in institutional assessment at schedule points of development in his/her program of study.

Designed to ensure continual organizational improvement, NCTA's assessment process shall include, but not be limited to, placement exams, national licensing exams, projects, proficiency exams, performance assessments or capstone courses to measure higher order thinking skills, internship evaluations, student needs and satisfaction surveys.

All full-time entering students will take a basic skills placement test as an admissions requirement. All full-time graduating students will fulfill the assessment requirements of both their program of study and the institution in general. All full-time students will participate in surveys evaluating student needs, levels of student satisfaction and other co-curricular aspects of the College's environment.

Veterinary Technology  
LEARNING CONTRACT**

I, \_\_\_\_\_, agree to the following terms on this  
(Student Signature)  
**learning contract. I understand that my grades in classes reflects the effort that I have  
make to follow these contract terms.**

1. I will attend classes, both lecture and laboratory as scheduled, not missing not more than three hours of class during the session/semester.
2. I will read assignments prior to the class in which it is to be discussed. This will help me to understand the material and to ask questions that will contribute to my understanding.
3. I will review my notes taken in class each night. This will help me to remember the concepts covered in that class, and therefore improve my test scores.
4. I will keep a chart of homework, quiz and test scores in my notebook so that it will help me to understand what grade I am earning.
5. I will participate in a manner that will contribute to my learning the class material. I will be a part of the classroom "TEAM".
6. I understand that I am responsible for what I learn and the grade I earn.

## Field Trip Policy

The University reserves the right to determine the requirements necessary for student participation in university-sponsored field trip courses. In no instance will these criteria for enrollment violate the University's non-discrimination policy.

Students participating in university-sponsored field trips are expected to conform to the same standards of appropriate behavior as published in the Nebraska College of Technical Agriculture Student Handbook and other university publications pertaining to student rules and regulations. The University expects each student to exercise self-discipline, which will enhance the educational experience and the learning environment for all field trip participants. Students are expected to obey the laws of state and nation, and the regulations of the University, and to refrain from any conduct while on the field trip that is injurious to themselves, to others, or to the reputation of the University.

Any violation of published rules and regulations of the University, the student code of conduct as expressed in the Student Handbook, or of local, state or federal laws may result in disciplinary action or sanctions by the University. Failure to comply with the lawful direction of university personnel acting in the performance of their duties may also result in disciplinary action by the University. The University reserves the option of initiating disciplinary action on its own including the dismissal of the student in the midst of the field trip experience and requiring the student to return to the campus at his or her own financial expense. Any subsequent disciplinary action resulting from the field trip misconduct will be in accordance with established rules and regulations of the University. In the event dismissal action is taken on the field trip, the University will contact the person previously designated by the student to be notified in the case of an emergency.

Violations of state criminal statutes or any unlawful action on the part of the student while participating in the Nebraska College of Technical Agriculture field trip will require the University to immediately notify local law enforcement authorities.

**Nebraska College of Technical Agriculture  
Veterinary Technology  
Degree Path**

**Certificate** - Animal Care (30 hours)

**Associate of Applied Science - Veterinary Assistant Option**

- The Associate of Applied Science, Veterinary Assistant Option allows the greatest flexibility of class selection and career planning. This option requires 72 credit hours, a 12 week internship and a CGPA of 70% to graduate.

**Associate of Applied Science - Veterinary Technician Option**

- The focus of NCTA’s Associate of Applied Science, Veterinary Technician Option is to provide the hands-on skills and academic background needed to accept career opportunities as an entry level veterinary technician. The program is American Veterinary Medical Association (AVMA) accredited with the curriculum based around the AVMA essential tasks and skill list. Veterinary Technology – Technician Option graduates are qualified to sit for the Veterinary Technician National Licensing Exam and become a licensed Veterinary Technician. NCTA maintains a wide variety of animals to provide the students with a consistent and broad background of experience. This option *requires 80 hours of observation in a veterinary clinic, 80 credit hours of structured classes covering AVMA essential skills, a 12 week internship, passing the exit exam and, a CGPA of 80%.*

**Optional Minors and emphasis**

**Minors (added to AAS)**

- Business
- APS – Livestock
- APS - Equine

**Emphasis (added to AAS)**

- Equine
- Food Animal
- Exotic
- Companion Animal

The degree path I am currently pursuing is: \_\_\_\_\_
