

# Soils Judging Contest Practice Sites

The soils judging contest will include 8 to 12 practice sites that will be available beginning March 28. More details on the practice sites and their locations will be provided to all registered teams at least 2 weeks prior to the competition.

For more detail and soil information, consult the Web Soil Survey at: <http://websoilsurvey.nrcs.usda.gov/app>

For the purpose of this map, the soils of Nebraska have been grouped into 80 soil associations. A soil association is a grouping of soil series geographically associated in a characteristic repeating pattern and directly related to topographic areas such as uplands, terraces and bottom lands. They are numbered in the order of their estimated extent within the state; that is, the association with the most acreage is number 1 and that with the least acreage is number 80.
