

The Nebraska College of Technical Agriculture (NCTA) recognizes the importance of supporting new mothers who wish to continue to breastfeed while they are at work or attending school. NCTA acknowledges the health benefits of breastfeeding and believes that NCTA should make private, accessible, and comfortable lactation rooms available to its employees and students who want to express milk while on campus and away from their infant.

Lactation Spaces

There are several spaces on the NCTA Campus that are designated as lactation rooms. The spaces are semi-private and typically do not require a key or any form of permission for entry. Each space is equipped with a comfortable chair, a table, and an outlet. If the room is locked, call the security phone at 308-367-7504. for entrance.

Room Locations-

- Ag Hall- Room 7
- LTC- Conference Room
- Vet Tech- Room 158

Lactation room users are responsible for bringing their own equipment and cleaning up after each use.

Refrigerators

NCTA has a limited number of refrigerators that may be used for milk storage during the period of lactation. The refrigerator in Ag hall second floor, the Livestock Teaching Center , Vet Tech Building and the kitchen area of the Ed Center may be used for storage. Please clearly mark containers.

Time Away from Work

Supervisors will attempt to be flexible and provide reasonable accommodation to support the needs of nursing mothers. Employees, in consultation with their supervisors, are permitted to flex their work schedules for the purposes of lactation.
