

AGRONOMY PLOT TECHNICIAN SUMMER INTERNSHIP OPPORTUNITY

Central/Western Nebraska

The WinField Answer Plot® Program hosts 200 agronomic research plots across the country. Plots provide area farmers to see firsthand how seed and crop protection products perform in local fields, allowing them to make decisions for their own operations with confidence. Learn more at www.answerplot.com

Starting at \$18 per hour (after obtaining the required pesticide licenses). We are looking for motivated students to assist our operational Answer Plot crew. Position starts in April or May and ends in August (flexible start & end dates)

What will I be doing?

- Tissue Samples, Soil Samples, & Stand counts
- Foliar Research applications with a backpack sprayer
- Weed control by means of herbicide applications & hand-weeding
- Most work will be outdoors and in a remote based environment
- Farm equipment preparation & operation such as planting and spraying
- Attend tours to learn about new agronomic trends and precision ag. technologies

What does it take?

- Safety Mindset: Possess a sincere desire to work safely and look out for the wellbeing of coworkers
- Self-motivated with ability to work both independently & in a team environment
- Able to explicitly follow directions and proven record of following-through on projects and work duties
- Ability to work extended hours in an outdoor environment with >50% overnight stays in hotels (*meals & hotel costs are covered by company during travels and a company vehicle is provided*)
- Ability to obtain a pesticide applicator's license
