

## Internship/Full Time Position

We are located in Imperial NE, we run a pretty diversified operation, all cattle and no farming. The largest portion of the operation is turning out 10,000 head of grass cattle in NE, WY and KS. We background them at about 17 feedlots in a few different states. We typically turn up to 4,000 head of them out on rye before going to grass. In the winter we will have 500-1,000 head of cows and bulls turned out for our bred cow project and a couple hundred old bred cows we carve out along with 500 or so yearlings on cornstalks.

We have built a new shop and pen facility 1 mile north of Imperial that we use as headquarters and gathering location for smaller groups of cattle to get worked and redirected to other places.

We are looking for someone who wants to make a lifetime career with the possibility of shared ownership in livestock with us. The person needs to be extremely motivated and self-reliant, not afraid to take on any task.

Typical duties will be some other the following

Fencing

Livestock care, vaccination, doctoring, checking etc.

Feeding

Hauling livestock

Checking livestock and putting out supplements

Light mechanical duties

Facility maintenance, welding is a huge positive

Equipment maintenance and cleaning, including cleaning livestock trailers

Along with about anything else possible you can think of. Person needs to be able to think on the fly and ready to shift gears and directions at a moment's notice. Honestly and strong work ethic is a top priority.

The opportunity at our operation is as endless as the person wants it to be.

Thanks

Doug Wilson

Wilson Cattle Co

Imperial, NE.
